

Visionable Connect

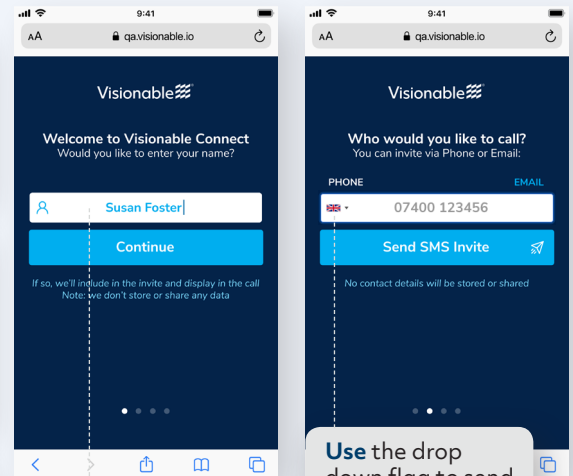

How it works

Keeping friends and families together, even when they're miles apart

To make a call

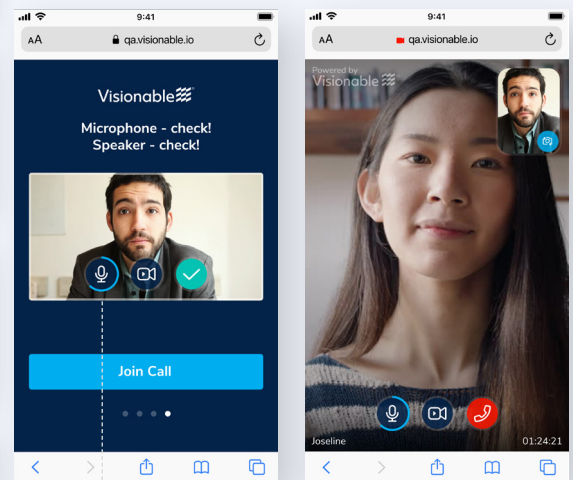

- 1 Open Visionable in a web browser**
Type in your given **unique** URL to get started. No download or sign-in necessary.
- 2 Type in your details**
Enter your name or details which will be shared with the other person joining the call. No data will be stored outside this call.
- 3 Invite a friend or family member**
Enter their mobile number or email address and click to send an invite. No data will be stored.
- 4 Test your device**
Enable your microphone and camera and test your audio settings.
- 5 Join the call**
Once the invitee has clicked on the link to join, everyone will be entered into the call.
- 6 End the call**
Either side can end the call using the red button.

Please note: When trying to make a call, Visionable Connect will only work if the calling device is connected to the NHS Trust's WiFi. This will not work on 3G/4G/5G within the Trust.

Option to type in a name

Use the drop down flag to send a text message internationally

Bar will adjust to show microphone and audio levels

Your call will begin when your invitee has clicked the link to join and has passed set up checks
